

Diamond Multi-Purpose Jig Saw Blades

High performance blades
for challenging materials

Diamond tough enough to tackle jobs that defeat other blades. Ideal for hard, snaggy, brittle and abrasive materials.

C4 | carbides
CUTTING EDGE TECHNOLOGY

The one blade to keep in the saw

Diamond grit blades

C4's brazed diamond jig saw blades deliver the highest performance on the most difficult of materials. They will cut where no other blade will, quicker and for longer.

These blades are extremely robust, have the ability to cut curves smoothly and without breakout and incorporate patented Reduced Kerf Technology (RKT) for faster cutting.

Features

High grade diamonds

Form the cutting edge to cut the hardest of materials

Superior brazing technology

Ensures diamonds stay bonded for longer

Reduced Kerf Technology (RKT)

Faster cutting, minimises material waste

Blade backer

High grade steel for durability and safety

	Diamond Multi-Purpose Jig Saw Blade Range
Shank	T-Shank
Application use	Porcelain Tile Ceramic Tile (non porcelain) Cement Board Plasterboard Carbon Fibre Fibreglass Laminate Flooring Cement Cladding Marble Slate
Power units	Corded and Cordless
Recommended speed (SPM)	2800
Size range	76mm (3") 82mm (3 1/4") 89mm (3 1/2") 100mm (4")
